堀尾吉晴在城期の浜松城中枢部と城下町

Central Area of Hamamatsu Castle Under HORIO Yoshiharu and the Castle Town

天正18年(1590年)、徳川家康は豊臣秀吉の命令で江戸城へ移り、家康の旧領には秀吉の家臣の大名6が配置されました。岡崎城に由中古政、版府城に中一一氏、州川城に山内一豊、そして浜松城には堀尾古晴が入りました。古晴は、浜松城に高い石垣を築き、瓦葺きの福や城門、そして天守を建築しました。天守や門の位置から浜松城に変を正治にして整備されたとみられます。

TOKUGAWA leyasu moved to Edo Castle in 1590.

The territories governed by leyasu up until then

were distributed to Hideyoshi's retainers. Okazaki Castle was given to TANAKA Yoshimasa, Sunpu Castle to NAKAMURA Kazuuji, Kakegawa Castle to YANAHUCHI Kazutoyo and Hamamatsu Castle to HORIO Yoshiharu. Yoshiharu buit the high stone walls, watchtowers with tiled roofing, the castle gate, and the main castle tower. Judging from the position of the castle tower and gate, it appears that Hamamatsu Castle was built to face the east. We are able to learn about the renovations made by Yoshiharu through the stone walls that are still standing today and the results of our excavations. The excavations tell us that the grounds of the castle tower bailey were lower than it is today, and there was a surrounding stone for 3.2m in length.

The excavations tell us that the grounds of the castle tower bailey were lower than it is today, and there was a surrounding stone fort 3.2m in length. It is possible that there was a watchtower with a tiled roof in the southeast corner of the castle tower bailey.

The current castle tower built in 1958 has a 3-floor structure but it was deliberately made smaller compared to the size of its base.

It is thought that the castle tower built by Yoshiharu had 5 floors and a basement based on the scale of the tower platform and Matsue castle which was also built by Yoshiharu but completed after his death.

It is thought that watchtowers were attached to the front and back of the castle tower in a composite style.
